#### Lamentable Death Near Levias.

Miss Hattie Donakey died last Friday morning, June 9th, at the home of her mother, Mrs. Harriett \$1,100,000 in Coal Lands Sold to Donakey, in the Levias neighborhood. She had been complaining more than usual for several days, but as she has always been an invalid, nothing serious was apprehended. In the night she was taken worse and altho everything that loving hands and hearts could do was done 'twas This, however, will not interfere all of no avail. She passed away h the administration of the coun- peacefully at 3 o'clock in the morning. Miss Hattie was born July 24, beriff W. M. Berry, failing to 1881, and was nearing her 24th bond for the collection of the birthday. She professed faith in and tax in the Caseyville and Christ when in her 15th year at le precincts, has been removed Union and had lived a consistent christian. The funeral was conducted ast Monday Attorney Helm, of by Rev. J. S. Henry and the burial irm of Helm, Bruce & Helm, of took place at Union church cemetery sville, made a motion in the Friday afternoon. The floral offerty court that a levy be made on ings were numerous and attested in Caseyville and Lindle precincts language stronger than words the the amount of the bends out- esteem of her neighbors. A large ding against those districts and concourse of sorrowing friends and relatives gathered at the cemetery to eing compelled to do so Judge pay a last tribute to her beautiful pents made the levy. These mal life and air currents of the caves. -holes mark where caves have and the results of his inquiries were filled by the earth falling into published in the January number of cavities. The largest sink-hole the Biological Bulletin of the Union is called "Eden Valley," with versity. The air currents in these caverns and subterranean passages enormous depression is without are a great mystery. They keep in or outlet, and the geologists motion all the time in the same direction, and often cross each other. and the larger the cave the stronger and more marked they are. At Mamew caves are being discovered moth Caye, for example, a strong tantly. The limestone rock which breeze is blowing from the entrance rlies Edmonson county has been at all times, and Dr. Eigenmann ually eaten away through the says, "the current may become a until it is now honeycombed fierce gale if barometric changes caverns, many of which are outside are rapid or if the water in the cave rises rapidly." Barometric conditions outside have considerable effect on the currents. If the pressure is heavy, he says, there will be an inflow of air instead of an outflow. and this will be proportionate to the rise of the barometer and to the size mal Cavern Club," whose mem- of the cave. If the barometer is falldevote their leisure time to ex- ing, there will be an outpour of air, which varies with the slighest shift-

Another extraordinary fact is that the temperature of all of the caves is precisely the same at all times, winter and summer. Meteorologists have hung up their thermometers for weeks at a time, and have made observations packed for transportation to powder several times a day. But the mer- factories in the east. The yield was cury seldom varies a degree, and usually stands at 54 degrees Fahrenheit, regardless of the weather outside. The late winter has been the could supply the whole world with coldest known in this part of the saltpeter. Dr. Hovey asserts that ountry for many generations. In the Americans would have been beatnorthern Alabama there has been sleighing, and ice has formed upon caves of Edmonson county, Kentucky, the ponds and rivers sufficiently strong at a time when our powder manufacfor skating. People who have been tories were cut off from foreign digging sewers say the soil was frozen sources of supply.

It is not usual for people to regard and set up an electric power plant these natural wonders as having a that will light the hotel and the cave commercial value, but this is a prac- throughout and run the cars. tical age and an eastern syndicate and a half from Mammoth Cave, has recently been making investiga- from which wagons are now running tions and is now negotiating for the to it regularly.

in the caves has not varied.

purchase of a large area in the cave district of Edmonson county for the purpose of taking out the onyx and alabaster with which the caves are filled. According to the geologists all of the subterranean passages have been made by chemical action. The soil is underlaid by vast strata of limestone, and water charged with carbon dioxide has the solvent power to dissolve the stone. The action has been going on for millions of years and still continues. In the Colossal Cavern, one of the grandest of the group and the most recently discovered, is a hall or corridor called "Snowy Valley," where the floor is thickly covered with fine flakes of pure white gypsum, which is constantly falling from the disintegrating roof of the ceiling above and resembles snow.

illustrations of the processes by away. The work began in a fissure, sold by Woods & Orme. or joint, in the limestone ledge which caught waters charged with carbon dioxide, and time has done the rest. terranean streams which furnished the members of the Strothing and 3, the water power were ever larger. 000 of the people were assembled. The "problem is solution," as one of the geologists has called it, the great the quarters of the commandant, the work of excavation, has never been Strothing formerly dissolving the unarrested a moment since it began ages ion of Sweden, ago. The irregularity in the caverns due to the fact that the rock is harder in some places than in others and yields less readily to solution.

The stalactites and stalagmites, which are also constantly forming, are of the finest quality of onyx What is claimed to be the largest stalagmite in the world is found in the new Colossal Cavern, and is called "Henry Clay's Monument." It is ninety feet high and thirty feet thick at the base and has been built up by single drops of water falling upon a certain point for unnumbered ages. In the smaller caves are enormgreen, which is accounted for by the absence of copper. There are blocks of pure onyx which may be easily quarried by machinery, 300 feet long. and eighty feet thick to their visible depth, and how much deeper they may be nobody can tell. One cave contains slabs and blocks of beautiful cream-colored alabaster, perfect in texture, color and of uniform thickness (about two inches). One of these slabs has been found upon measurement to be over 100 feet long. In places they overlie each other like sheets of paper. A drill fifteen feet long failed to reach the bottom.

Nobody has ever attempted to quarry this beautiful substance. So far as known the onyx and alabaster of the cave district have never been utilized for practical purposes. But, as I have said, an eastern syndicate proposes to take advantage of this new and great source of wealth. Years ago and for generations the soil of the caves, which is rich in niter, was used for the manufacture of saltpeter. The natives called it 'peter dirt;" they dug it up in the caverns, brought it out in sacks. loaded it into ox carts and carried it to boilers, where the concentrated , and Kentucky, being blessed ing of an ordinary mercurial baro- liquor was run through hoppers filled with wood ashes, boiled a second time and then cooled in wooden troughs. The bottoms of these troughs would be covered with crystals of potassium nitrate, and when the liquor was drawn off they were scraped out and the crystals were about four pounds of nitrate to the early days of the last century it was boasted that Mammoth Cave alone been for the nitrate supplied by the

THURSDAY, JUNE 15, 1905.

#### ANNOUNCEMENTS.

H. COCHRAN, of Marion, as a candities of Crittenden and Livingston, of rest and enjoyment. subject to the action of the Democra-

CHARLES O. POGUE, of Frances, as a plenipotentiaries; to which all good candidate for Sheriff of Crittenden people most heartily say, amen! county, subject to the action of the Democratic party.

With this issue the Press begins its 27th year. The last issue, Vol. 26 No. 52, comprised 2300 copies, the largest regular edition of the "Crittenden Press" ever printed; 37 States are represented on the PRESS mailing lists, besides the Philippine and Hawaiian Islands, Mexico and other foreign countries. The PRESS hopes to merit the liberal patronage it receives and will endeavor to give its patrons the local news and as good a general county paper as it is possible for us to get up.

The PRESS was started by Mr. R. C. Walker 26 years ago with a pint of old type and a wornout Ramage hand-press. It was a modest little 5-column folio, but being spunky and aggressive soon grew in popular favor and usefulness. At the time of its birth Marion was a dilapidated village of 500 people. To-day THE CRITTENDEN PRESS is a six-column, 8-page journal, clothed in the handsomest metalic garb that money can purchase; issued from one of the finest equipped county printing offices in Kentucky, printed on the latest improved cylinder press driven by a 5-horse power motor or a 4 h. p. gasoline engine, and has for its home what soon will be one of the handsomest cities of 2500 people to be found in the Southwest.

The recent deal by which the great New York coal trust, headed by J. Pierrepont Morgan becomes the possessors of over 100,000 acres of the finest coal lands in the State, reaching from the eastern part of Crittenden to DeKoven, means much for Western Kentucky and especially the counties of Union, Webster and Crittenden. The present owners of this property are men who do business on a tremendous scale; it takes millions of bushels of coal yearly to run their various plants in different parts of the country, and this coal they propose to mine from their newly purchased property. This means that new shafts will be sunk all along the line; that from 8,000 to 10,000 miners, with their families, must be brought here to do this work, and estimating four to every married man's family gives us some 25,000 additional mouths to be fed and clothed by our farmers and merchants. Just figure out how much money that

#### Wooed and Won.

Marysville, O., June 8 .- A romance which began in this city about a year ago has resulted in the marriage on June 1 at Weiser, Idaho, of Prof. J. M. Martin, son of J. P. Martin of Marysville, and Miss Frances Phelps of Ravenna, Ohio.

Prof. Martin was called to superintend the schools at Weiser a year ago and he took three Ohio teachers with him. Among them was Miss Phelps, who taught in one of the grades under him. He soon won her heart and hand. The bride is a graduate of the Oberlin, Ohio, college, and has taught in the schools of Ravenna. The couple are now on their honeymoon trip to Portland, Oregon, after which they will take up their residence in Lagrange, Ore., where Prof. Martin will superintend the

#### TOPPENISH, WASH.

A Good Town, a Fine Country, And a Great Future of Possibilities.

From Toppenish, Wash., Review.

This great Yakima valley will be "white man's country" within the coming year. The red man has his allotment, and by force of circumstances is a rich farmer. The half and quarter breeds are educated men, prosperous if they so elect, and otherwise if they please, in that they don't differ much from the Caucasian. Half the white men on earth would fiddle away a fortune in a week if they had it.

Tee much maudlin sentimentality has been wasted upon Poor Lo by the Boston Indian Rights Association, consisting of long haired men and short baired women. What the In diam really needs is self-reliance. It may be a hard old school, this experience business, but we have all had our heads bumped, and they are bet ter for the bumping. When this reservation is opened many thousands of happy homes will spring up in the God-blessed land. The red man will enjoy a greater meed of prosperity. than left alone in his aboriginal state. His children will enjoy the benefits of a magnificent public school sys-tem, he will hear how the white man raises cantaloupes, potatoes, big rec apples, alfalfa, chattle mortgages, twins, sheep and a good many other

Every day a crowd of home hunters visit the town seeking locations. If reasonable rentals and conditions can be found they invariably remain. If this land were open tomorrow, in ten days every quarter section would be occupied by an actual permanent resident.

The reasons are many and plain: The rich alluvial soil has practically

no bottom. Water for irrigation is abundant, Colorado never grew as sweet

sugar beet. Hood river berries look like culls

in comparison. Eight tons of Alfalfa are common.

Greeley would hold a continuous carnival of joy if she produced such

And if that were not enough everything in proportion.

Sounds like a real estate boomer's mightmare, don't it? Yet, every word is gospel truth.

And the town:

drifted, satisfied to be a mighty good trading point for the cow man, the sheep man, the native.

builders, broke into the solitude.

town and a short time ago the enterprise of Mrs. Josephine Lilly

### Sick Headache

When your head aches, there is a storm in the nervous system, centering in the brain.

This irritation produces pain in the head, and the turbulent nerve current sent to the stomach causes nausea, vomiting.

This is sick headache, and is dangerous, as frequent and prolonged attacks weaken the brain, resulting in loss of memory, inflammation, epilepsy, fits, dizziness, etc.

Allay this stormy, irritated, Dr. Miles' Anti-Pain Pills.

They stop the pain by soothing, strengthening and relieving the tension upon the nerves -not by paralyzing them, as do most headache remedies.

Dr. Miles' Anti-Pain Pills do not contain opium, morphine, chloral, cocaine or similar drugs. "Sick headache is hereditary in my family. My father suffered a great deal, and for many years I have had spells that were so severe that I was unable to attend to my business affairs for a day or so at a time. During a very severe attack of headache, I took Dr. Miles' Anti-Pain Pills and they relieved me almost imraediately. Since then I take them when I feel the spell coming on and it stops it at once."

JOHN J. McERILAIN.

Pres. S. B. Eng. Co., South Bend, Ind.
Dr. Miles' Anti-Pain Pills are sold by your druggist, who will guarantee that the first package will benefit. If it fails he will return your money.
25 doses, 25 cents. Never sold in bulk.

Miles Medical Co., Elkhart, Ind

Miles Medical Co., Elkhart, Ind

brought eighty acres of her allotment into the market as town lots, where the purchaser might get a warrentee

Then there was something doing. Within two months half a hundred houses were started; this week a hotel and a big store are beginning to

For the next few months we can but speculate. But in a year from now Toppenish will have five thousand prosperous, happy people, drawing their substance from the most fertile land on the face of the globe.

The future prosperity of Toppenish is assured. Lying as it does in the heart of the Yakima Indian Reservation, and also Yakima county, it presents an extensive area of productive land, second to none on the mundane sphere; is bounded on the north by the richest fruit bearing belt of and in the United States, and containing within itself thousands of acres of soil adapted to the growth of almost any class of erop that may be grown in temperate and semi-tropical

As evidence of this there were shipped during the past season alfalfa, timothy, clover, wild hay, wheat, barley, oats. rye, corn, potatoes, onions, hops, wool, cantaloupes, melons, cucumbers, peppers, egg plant, apples, pears, peaches, apricots, plums, prunes, quinces, etc., as follows: Hay, 539 cars; potatoes 255 ears, grain 101 cars, fruits 186 cars, and shipped by express an amount equal to 40 car loads of fruit.

Live stock shipped to market from this point during the six months ending October 2 was 117 cars against 42 cars for the same period last year. The actual number of cars of produce shipped from May 1, 1904 to October was 1,479 cars, as against 1,684 for the same period this year.

In addition to the produce already referred to, the representatives of the proposed sugar factory to be erected at North Yakima are contracting with the farmers of this section for raising several hundred acres of sugar beets. The agricultural expert pronounces the soil around Toppenish superior to anything in the country interest you. He says: "I suffered for that purpose, the exceedingly agonies, because of persistent cough, mild-climate being specially adapted to the production and harvesting of the crop sure and safe.

ting purposes makes the land in the entirely cured my cough, and saved vicinity of Toppenish a sure producer of all the various products before

#### Just What Everyone Should Do.

I keep a bottle of it in my room as I have had several attacks of colic and it has proved to be the best medicine I ever druggists.

#### Begins the Survey,

committee of the house will be favor- can people." able to the proposed nine foot stage of the Ohio river the federal commission of engineers today began a sur- help him, and he advocated the devey of the river at this point.

survey in this city is to determine the feasibility of such an improvement more than anything else, tho' it is understood that as soon as it is tinue it further down the river.

Again it is thought by many and word has sobeen given out by authoritative sources, that the beginning of the survey, which was planned for last winter, means that the work is to be pushed without stopping from Pittsburg to Cairo, and that the entire improvement as it is to be made will be laid out. By the source from which this information was gleaned it is further said that the survey is the genuine article and the one that will be followed in case the favorapropriation for the work allowed and not a test as is imagined by many.

The work of survey of the river from its navigable source to where it empties into the Mississippi, will take considerable time, though it is hoped to have it completed within the next four months.

#### Yellow Fever Germs.

Greencastle, Miss., June 6,-According to statements made by James McLauren, a relative of United States Senator McLauren, who has just returned to his home in Washington county on a furlough from his duties as a soldier in the canal zone. Uncle Sam has accomplished wonder, on the Isthmus of Panama in sanitary de-

McLauren has been in the tropics for many months and served in the United States Army during the war in the Philippines. He says he has no more fear of yellow fever than he has of an ordinary chill, and for this reason he consented to a strenuous experiment made by the sanitary officers on the Isthmus in an effort to eliminate the dreaded yellow jack.

"I have spent much of my time in tropical countries and have seen many deaths from the fever," said McLauren, "and I was boasting one day of not being scared and was invited to allow myself to be placed at the merey of he fever-breeding mosquitoes. I consented, and was placed under a bar with more than one hundred of the Panama insects, known to inject the germ of the yellow fever with every sting. I was attacked by fever four days afterward. The physicians forecast the time of my attack within

"I was ill for nine days but recovered speedily and never enjoyed better health than I did after being discharged from the hospital.

McLauren said that he was not the one Uncle Sam's medical servants incased in bars for experimenting with the bite of the fever mosquito. Sev. eral soldiers consented and not a case was lost. According to McLauren every stagnant pool has been drained with the exception of the far interior districts in the efforts to eliminate entirely the dangerous insect from the
